Agenda:

- i. EWA Issues review, edits, consolidation , and assign to groups
- ii. EWA Planning structure and groups
- iii. Participants in Group

Groups, issues, members:

The revised EWA Planning structure is lead by DNCT and answers to the CALFED Management and Policy groups via a stakeholder/CALFED group equivalent to the Quinn/Spear group. Five workgroups, listed below, will address different EWA issues and report to the DNCT. Each group will coordinate with CALFED Ops and other groups necessary to address their issues. The 99 Operations group focuses on 1999 operations, while the remainder of the groups focus on EWA for Stage 1.

The issues were reviewed and recommendations were made for combining and assigning to workgroup. **Each workgroup will meet refine the issues, select a leader for the group, and further refine the purpose, products, and schedule of the subgroup.** The progress on this activity will be reported back to the DNCT next Thursday.

Listed below are the workgroups, the issues assigned, and members:
